

graphic fabric™ installation

1: The RasterPrint™ graphic attaches to the structure with Velcro®. Be sure that the hook Velcro® surfaces on the structure are all facing the front of the unit. There is no need to disassemble the unit if you find a piece facing the wrong direction- simply rotate the piece in place until the hook surface faces the front. Graphics should be installed without the shelf hardware in place. Start the graphic installation in the top corner of the assembled unit as shown.

2: Secure the graphic to the top curved piece first. Next, from the back of the unit, attach the Velcro® to both corners, keeping the graphic taut as you do so. Lastly attach the bottom.

3: Attach the Velcro® to all four sides of the right (or left) side remaining side panel.

4: Finally attach the shelf hardware.
