

# TILT™ Graphic Stand

## full tilt graphics...

Infinitely variable along 3 planes, the TILT Graphic Stand is like nothing you have seen before. Rotate the banner side to side a full 360°. Heck, give it a spin... nobody's watching! Raise the graphic vertically on the telescopic upright to position it perfectly while vertical or horizontal, or any place in between. Now, tilt (of course) the graphic forward or backward so it is viewable at any position. A wide range of graphic sizes can be accommodated- even square- due to the "X" graphic mounting method and adjustable length tensioning poles. Check out the Tilt Graphic Stand today, and add the power of "full tilt" graphics to your message!
